

Suggested color code for 8
leader cable. Shield
connected to connector
house.

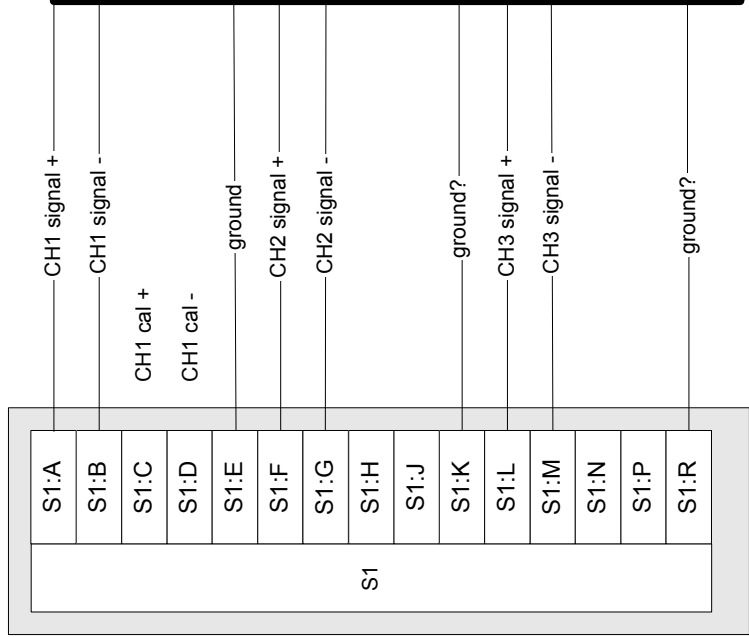

Souriau 851-00E14-18S50 (panel)
or
Souriau 851-01EC14-18S50 (free)
18p female

Souriau 851-06EC14-18P50 (free)
18p male

Ground? Means not
always used. Depending
on sensor cable / digitizer.
Ground on E always used.

To
surge protection
and sensor

Connector to
digitizer

Our standard connectors for sensor-digitizer are called MIL-C-26482.
They are produced by FCI (Souriau), AMP, CANNON.....
Souriau calls them serie 851. (www.souriau.com).
Distributor in Norway is Arrows Hatteland.
IP67 when using sealing ring and grommet (for free plug).
